

Summary of Qualifications

I bring more than 4 years of expertise as a dedicated and proficient front-end developer, contributing to the complete software development life cycle. I can write clean and readable code with OOP principles, make documentation, perform refactoring, cover code with unit tests, and conduct code reviews.

I like to work both in a team and individually. I like creative and innovative tasks that make the final product useful and unique from everyone else. I like working in a team, especially when there are open, communicative, and sincere people – the same way I see myself.

As a Front-End Developer, I worked mostly with React, React Native, and NodeJS.

My most outstanding qualities are responsibility, perseverance, attention to detail, good communication skills, the ability to solve problems, and a love to learn new things.

Skills

Programming Languages/Technologies

- JavaScript /TypeScript
- NodeJS
- Technical Documentation/Architecture Reports/Proposals/SRS
- Software Architecture Design/UML/Reverse Engineering/Design Patterns
- XML/JSON
- HTML/CSS/LESS/Sass
- SQL

NoSQL

- MongoDB
- Firebase

Virtualization Tools

- Docker

Methodologies

- Agile, Scrum, Kanban
- Pair Programming
- Feature Driven, Behavior Driven Development
- Waterfall

Operating Systems

- Microsoft Windows
- Debian/Ubuntu/ArchLinux
- macOS

Testing Tools

- Postman
- Mock
- Jest
- React testing library

Frameworks/Libraries

- React
- Redux
- Redux thunk
- Redux toolkit
- RTK Query
- React Query
- Material UI
- React hook forms
- React Native
- I18n
- Auth0
- Axios
- Formik
- ChartJS
- Express
- NestJS
- NextJS
- WebSockets

Development Tools

- JET Brains Products
- Chrome Development
- VS Code

Versions Control

- Git
- GitHub
- BitBucket
- GitLab

Experience

Project Description:

Mobile marketplace

An innovative retail app empowering merchants to create a digital identity upon registration, enabling them to showcase products, offers, gift cards, and subscriptions. The app includes a marketing admin feature for easy product promotion via QR codes and URLs. Consumers can conveniently scan and purchase products using external payment wallets, enhancing the overall shopping experience.

Domains:

E-commerce

Involvement Durations:

1 year

Project Role:

Front-End Developer

Responsibilities:

- Front-End development;
- System architecture;
- UI/UX development;
- Bug fixing;
- Logic related to money transfers and general marketplace logic;
- NFC and QR-code payments;
- Implementation of authorization workflow, using biometrics.

Project Team Size:

1-2 team members

Tools & Technologies:

React Native, RTK Query, TypeScript, Formik, Auth0, I18n, react-native-biometrics.

Project Description:

Tracking cryptocurrency platform

A fintech app optimized for mobile, offering AI-powered trading, real-time asset monitoring, and multilingual investor communities. Built with a focus on seamless user experience, scalable backend architecture, and a high-converting landing page — all crafted for modern retail investors.

Domain:

Cryptocurrency

Involvement Duration:

1 year

Project Role:

Front-end Developer

Responsibilities:

- Front-end development;
- Deploy and publish of a mobile platform to app markets (App Store and Play Market);
- API integration;
- Fixing bugs;
- Unit testing;
- UI/UX improvements;
- Implementing new features.

Project Team Size:

3-5 team members

Tools & Technologies:

TypeScript, Redux Toolkit, React Native, React Native Paper, Socket.IO.

Project Description:

Web and mobile version for mail client

The project is an email service. It allows users to send and receive emails, organize their messages, and communicate with others. The product offers features such as a large storage capacity, powerful search capabilities, spam filtering, and integration with other services.

Domains:

Email

Involvement Durations:

1 year

Project Role:

Front-End Development

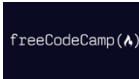

Responsibilities:

- Front-End development;
- System architecture;
- UI/UX development;
- Bug fixing;
- Logic related to receiving/sending mails
- Implementation of authorization workflow.

Project Team Size:

12-16 team members

Tools & Technologies:	React, React Native, RTK Query, TypeScript, Formik, Auth0, I18n, NextJS, Turborepo.
Project Description:	A hunter's pocket helper and friend An application that allows hunters to track their progress, share it with friends, and spend time completing fun and useful hunting-themed quizzes.
Domains:	Communication
Involvement Duration:	1 year
Project Role:	Front-End Developer
Responsibilities:	▪ Code development; ▪ UI/UX improvements; ▪ Bug fixing; ▪ Deploy and publish of a mobile platform to app markets (App Store and Play Market); ▪ UI/UX improvements; ▪ Implementing new features.
Project Team Size:	3-4 team members
Tools & Technologies:	React Native, React Native Maps, Styled Components, Redux, Jest, React testing library, Axios, React navigation, Formik.
